# Pro Tools 1

---

Pro Tools

APP2

12 Weeks

---

## Week 1 : Basics

A basic introduction to pro tools focusing on creating a new session, new tracks and familiarizing yourself with the different areas of the software.

## Week 2: Basics II

Expansion of your basic knowledge by importing audio. Learning basic navigation techniques and how to operate the transport. This week also includes details about the various grid options, tools and modes you can use within pro tools.

## Week 3: IO

This week focuses on getting sound in and out of pro tools. How to use the playback engine to select your audio interface and how to route audio inside and outside of pro tools. This week also looks at the workspace and session windows and talks about importing midi information into pro tools.

## Week 4: Templates Bussing & Inserts

During this lesson we learn how to create our own session and track templates. As well as explore inserting plugins into channel strips in order to create or manipulate sounds.

## Week 5: Mid-Term Review

A review of all material covered up until this point. Open discussion as well as Q&A.

## Week 6: Mid-Term

A Multiple Choice Examination focusing on fundamental principals and quick keys.

## Materials

All Materials are available in PDF form free to download from [dajaun.com/Harris](http://dajaun.com/Harris)
